Ekaterina Mikhailova

GitHub LinkedIn katemo03el@gmail.com | (916) 839–9991 | California

Computer Science graduate with experience building AI-powered workflows, software tools, and data-driven systems for real users and businesses. Strong in Python, APIs, automation, and data analysis, with a background in turning unclear problems into practical technical solutions.

Education

University of California, Santa Cruz — Santa Cruz, CA
Bachelor of Science in Computer Science — *09/2022 – 06/2026*
Relevant coursework: Data Structures, Computer Systems, Machine Learning, Data Analytics

University of Manchester — Manchester, UK
Alliance Manchester Business School, Study Abroad — *09/2024 – 01/2025*
Coursework: Operations Management, Business Analytics, Strategy, Digital Transformation, Marketing Analytics

Experience

InfoMomentum — Remote
Founder & AI / Automation Specialist — *01/2024 – 07/2026*

- Started a small business while in college and worked directly with clients to understand their workflows, identify problems, and build technical solutions around their actual needs.
- Built AI-assisted tools and automated workflows across CRM, email, SMS, advertising, and reporting systems using APIs and system integrations.
- Managed solutions from setup through launch and iteration, testing workflows end to end, investigating failures and data issues, and improving processes based on client feedback.

Overture Maps Foundation — Santa Cruz, CA
Data Engineering & AI Intern | Project Lead — *01/2026 – 03/2026*

- Used Python, SQL, pandas, and DuckDB to analyze and reconcile large datasets, investigate inconsistencies, and test different approaches to improve data accuracy.
- Developed a solution that improved internal prediction accuracy from approximately **64% to 83%**, the highest result produced by the intern team.
- Led testing and collaboration across a team of 10 interns, coordinated findings, and helped turn analysis into a structured approach the team could evaluate.

Antforce.AI — Santa Cruz, CA
AI Solutions & Marketing Intern — *03/2026 – 06/2026*

- Built internal AI tools and workflows for recurring work, including assistant processes, meeting summaries, and reusable Claude-based workflows.
- Developed a live analytics dashboard used by a manager that reduced turnaround time for recurring analysis by approximately **4x**.
- Tested AI outputs and workflows for accuracy and usefulness, identified weak points, and improved tools based on how people actually used them.

Skills

Programming:	Python, SQL, JavaScript, HTML, CSS
AI & Automation:	AI agents, LLM workflows, prompt engineering, workflow automation, AI-assisted development
Data & Development:	pandas, DuckDB, Streamlit, REST APIs, Git, data validation, software testing, debugging
Systems & Product:	System integrations, CRM systems, requirements gathering, technical documentation, client communication
